

Studentworker/Intern Logistics (m/f)

Interested in working in a Start-up, Logistics and Industry 4.0?

Then join the MotionMiners team! We are a young tech start-up from Dortmund and develop the Motion-Mining®-Technology for an automatic recording and analysis of manual working processes in production and logistics.

Your responsibilities

- Supporting data analyses for process optimization
- Supporting system and process analyses at customer sites
- Independent development of project-relevant content
- Preparation of reports and documentation

Dein Profil

- Study of logistics, industrial engineering, mechanical engineering or comparable studies
- Interest in process analysis and optimization in the field of intralogistics
- Knowledge of Word, Excel, and PowerPoint required
- Experience in Lean Management, Six-Sigma, MTM, REFA and/or ergonomics is desirable.

What we offer

- 100 percent start-up atmosphere
- A cool team and flat hierarchies
- High degree of personal responsibility
- Dynamic and innovative working environment
- Modern work place in the Digital.HUB Logistics
- Best career and development opportunities
- The opportunity to actively design and shape our technology
- Exciting projects at renowned customers in production and logistics
- Legendary team events, flexible working hours, a lot challenges and fun

Ready to take off with us?

Just send us your application via E-Mail or give us a call!
We are looking forward to hearing from you!
